

PUZZLEBOMB

The grid is guarded by robots, who change the direction they're facing every second. Can you find a way through the grid without being spotted? You must move one space per second, horizontally or vertically.

There are two types of robots. They move from their starting positions as you step onto the grid. You can't stand where a robot is.

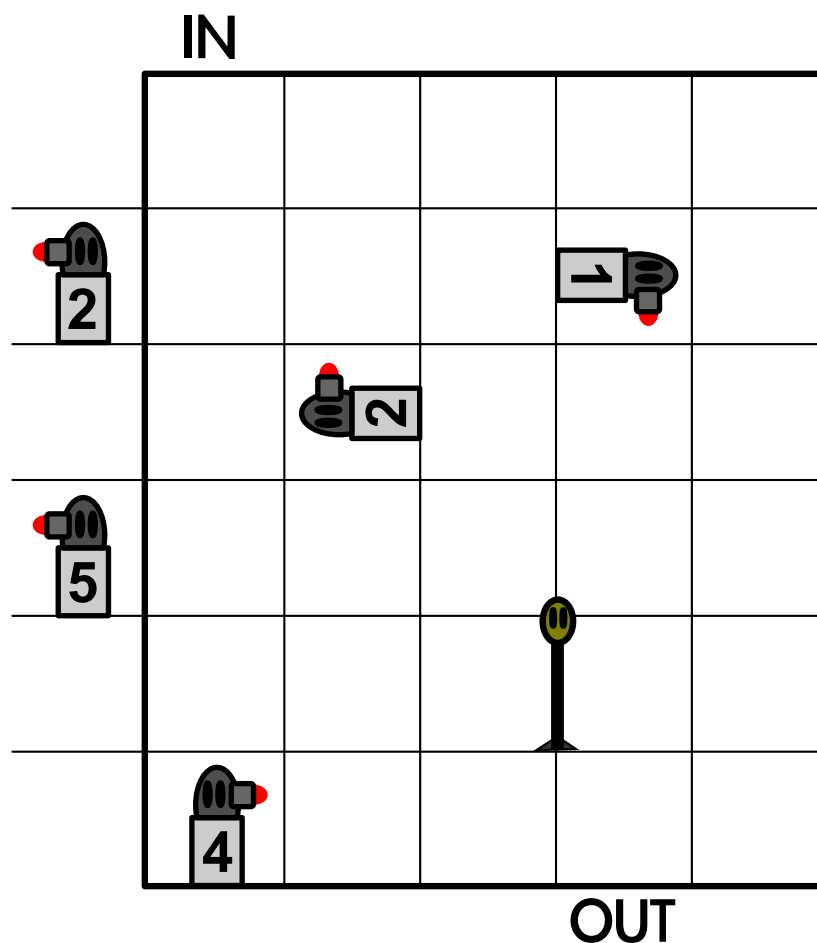

SENTRYBOT

 Can see n spaces ahead

Flips direction each second 

WALLBOT

Does nothing; You can't go through it
